PROFESSIONAL EXPERIENCE

Software Implementation Engineer, Telostaff LLC

January 2025 – September 2025

- Deployed to a US-based company, PERQ, to add call-to-action buttons linking to the multifamily marketing automation product on client websites
- Managed website content updates for property management clients using a content management system
- Implemented SEO improvements to increase website visibility

Full Stack Web Developer, Leekie Enterprises Inc.

June 2024 - September 2024

- Trained in the team's technology stack, including React, Laravel, SCSS, Webpack, Redis, Git, Docker, and Kubernetes
- Contributed to front-end development and created APIs for back-end systems
- Worked within the Kanban framework as part of the agile development process
- Collaborated with cross-functional teams to support and enhance shared projects

Shopify and Web Developer, Freelance

March 2023 – July 2023

- Redesigned and maintained multiple Shopify e-commerce stores for US clients using Liquid and the Shopify CMS platform
- Front-end redesign of a client's business website using HTML, Bootstrap, and JavaScript

Mobile Development Intern, Wedding Suppliers Association of the Philippines Inc.

August 2022 – September 2022

- Assigned to lead the team of mobile development interns.
 - Enhancing the existing company's android mobile application and tasked to develop the app for iOS devices.
-

EDUCATION

Bachelor of Science in Computer Science

June 2019 - September 2023

Polytechnic University of the Philippines - Sta. Mesa

- Thesis on "Android Malware Detection Using a Parallel Combination of OneR and J48 Algorithms".
-

SKILLS

Web Development

- React
- Laravel
- Next.js
- Tailwind
- SASS
- HTML
- CSS
- Webpack
- Shopify
- Bootstrap

Mobile Development

- React Native
- Android Studio

Database

- MySQL
- Redis

Programming Language

- Javascript
- PHP
- Java

Tools and Technologies

- Git
 - Docker
 - Kubernetes
-

PROJECTS

Website Portfolio (*Next.js, Tailwind*)

My personal portfolio website showcasing my introduction, tech stack, projects, professional experience, and contact information.

Cliff Motorshop (*Laravel, React, SASS, Webpack, MySQL, Redis, Git, Docker*)

A commissioned motorshop website featuring sign-in/sign-up, product ordering, and payments through Xendit, with an admin panel to manage products, orders, and analytics.

MotionRX (*Laravel, React, SASS, Webpack, MySQL, Redis, Git, Docker*)

A physical therapy clinic website where I updated frontend and backend content (accredited-by section on the homepage, footer info, and contact page details including location and FAQ) through a CMS developed by another team, and fixed cross-browser inconsistencies between Chrome and Firefox.

PlayVault (*Laravel, React, SASS, Webpack, MySQL, Redis, Git, Docker, Kubernetes*)

A project I built during my training period at my previous company, where I worked with a new tech stack for the first time (except React and Git).

MedicKare (*HTML, PHP, JavaScript, CSS, Bootstrap, MySQL*)

An online appointment scheduling website developed as a final requirement for Software Engineering and Web Development, allowing users to book hassle-free medical consultations.

HospiTrack (*Android Studio, Java*)

HospiTrack is an Android app I built in my third year that suggests nearby hospitals based on the user's location and provides details such as whether they accept COVID-19 patients.

Mobyte (*Android Studio, Java*)

A malware detection mobile app developed for our thesis, using parallel machine learning algorithms (OneR and J48) via WEKA to identify malicious APKs.
